

# Foundation Peace

MAKES CEMETERIES SAFER

SUSTAINABILITY

SAFE

DURABLE

MANUFACTURED IN SWEDEN FROM 100% RECYCLED PLASTIC

# Innovative product design

By investing in our headstone foundation you minimize the risk of getting an unstable headstone, which brings a peace of mind to the gravekeeper.

It is designed to endure for decades and foremost to prevent the headstone from leaning which in worst cases can result in accidents with lethal outcomes.

The design of the product enables adaption to a large selection of headstones since the dowels are adjustable and the width between the support edges is customizable.

Therefore the foundation can be used to both new and old headstones, with or without a base or dowels.

## Higher breaking point

As the product is made of solid, high-quality PP / EPDM, there is no risk of the product cracking or giving way to normal ground movement. The breaking point is displaced by strong support edges going up along the sides of the stone. The support edges also prevent the stone from tipping over if the dowels are completely consumed.

## Lots of counterweight

When the foundation is mounted, the soil masses that are below and above help to hold it in place. These masses act as a counterweight to prevent movement and the masses over amount to about 100 kg. The foundation itself weighs 8,5 kg with dowels and fully capable of withstanding at least 150 kg of pressure.

# Environment and sustainability

Foundation Peace is made of 100% recycled plastic of the highest possible quality. This gives an environmental saving of about 80% compared to if new raw material is used.

Recycled plastic has a lower climate impact than materials such as steel and concrete. The plastic raw material has undergone several analyzes and no microplastics or harmful substances such as PAH can be detected.

The production is ISO14001 and ISO9001 certified, this means that we will make calculations on all our climate impact.

Foundation Peace™	Each	Pallet (28)
Height	275 mm	2100 mm
Width	485 mm	800 mm
Length	600 mm	1200 mm
Weight	8,5 kg	260 kg
Co2-eq saving*	27 kg	756 kg
Pet-bottles*	544	15 232

Foundation Peace™ - L	Each	Pallet (16)
Height	275 mm	2200 mm
Width	800 mm	800 mm
Length	600 mm	1200 mm
Weight	12,5 kg	200 kg
Co2-eq saving*	39,7 kg	635,2 kg
Pet-bottles*	800	12 800

*\*Compared to using new raw material*

# Why did we innovate this product?

There is a vast urgent need to resecure and stabilize memorials. Our product brings the solution. The idea came to life when the founder who has a past in critical infrastructure heard on the radio that another fatal accident had occurred on a cemetery in Sweden by an overturning headstone. Cemeteries are often well cared for with a calm and beautiful environment. We don't want people to have to deal with leaning or unsafe headstones when they visit their lost loved ones.
